Emir Yöneyler

Software Engineer · Istanbul, Türkiye

emiryoneyler@gmail.com · linkedin.com/in/emir-yoneyler · github.com/EmirYoneyler · emirarcade.vercel.app

PROFILE

Computer Science student at Istanbul Aydın University. I build backends in Java/Spring Boot and Go, and full-stack products with React and Python. Currently interning on an AI photo booth, with freelance web projects on the side.

EXPERIENCE

Software Engineering Intern — AI photo booth current

Face-swap pipeline on Modal.com: 5–10 AI portrait templates per guest in ~10 seconds.

Freelance Web Developer — Self-employed ongoing

Backends and sites for clients — e.g. a Go/Fiber backend and admin CMS for a Kazakhstan logistics company.

SELECTED PROJECTS

MyMood Live

A social mood tracker: rate your day 1–10 and see how your friends are doing. Live on Render with a Neon PostgreSQL database. Sign-up, friends and the daily feed all work in production.

Go · Fiber · HTMX · PostgreSQL (Neon) · pgx · JWT · Docker · Render — mymood-5bh2.onrender.com

ALAGEMS Live

Website and backend for a valuable-cargo logistics company in Kazakhstan. Live at alagems.kz as the company's public website.

Go · Fiber · Admin CMS · RU / EN — alagems.kz

CoachAI Shipped

A webcam fitness coach that counts your reps and checks your form. A working prototype that counts reps and flags form for squats, curls and push-ups using an ordinary webcam.

Python · MediaPipe · OpenCV · NumPy · OpenAI API · Streamlit — github.com/EmirYoneyler/COACHAIprototip

The Critic Que Shipped

Movie intelligence: IMDb, Letterboxd, Rotten Tomatoes, Metacritic and Reddit in one place. One search shows five rating sources side by side, plus a Letterboxd Top 10 and director discovery.

Python · FastAPI · Pydantic · BeautifulSoup · React · Vite · Tailwind · Docker — github.com/EmirYoneyler/The-Critic-Que

UniAsistan In development

A Turkish Q&A assistant for university regulations that cites the exact article. 58 clean chunks from the regulation with no missing titles or chapters. Hybrid retrieval and the chat interface are next.

Python · PostgreSQL · pgvector · RAG · FastAPI (planned) — github.com/EmirYoneyler/uniasistan

Fund Bulletin Services Shipped

Three Spring Boot microservices that publish investment-fund bulletins. Auth and fund APIs run end to end (register, JWT, fund CRUD, popular funds, search). PDF rendering is the next step.

Java 17 · Spring Boot · Spring Security · PostgreSQL · JWT · iText7 · Docker — github.com/EmirYoneyler/bulletin-service

EDUCATION

B.Sc. Computer Science — Istanbul Aydın University in progress

SKILLS

Go · Java · Python · React · PostgreSQL · Docker

- Backend: Java / Spring Boot, Go / Fiber
- Full-stack: React, Python / FastAPI
- Data: PostgreSQL
- Ops: Docker, Render, Modal
